Vehicle Repairs Med 10: In service and operational at this time.													
Vehicle Repairs Med 11: Out of service indefinitely, to be auctioned.													
NOTES:You will probably notice a down turn in our transport percentage as the pandemic continues. Our directive is to not transport any person that does not have a life threatening issue, however, we do not refuse to transport if they insist. This is to mitigate the possible further exposure to the patient, ED patients and/or EMS personnel.													
Should the patient be able to be treated on scene or at home and not transported, this is what we will be doing temporarily.
